

We asked the community to have their say on options to help preserve the Stockton coastline for future generations

Top 3 things for CN to consider when assessing coastal management schemes:

- 1 Extent to which each provides a buffer against coastal hazards
- 2 Impact to beach amenity, the foreshore and recreational opportunities
- 3 Impact on the coastal environment

BENEFITS AND CONCERNS

Maintenance nourishment

- ✓ Keeps the beach sandy
Most 'natural' solution
- ? Subject to political change
Area still vulnerable

Artificial reef

- ✓ Would attract marine life
Recreational opportunities
- ? Doesn't prevent erosion
May need more than one

Artificial headland

- ✓ Keeps sand in the area
Enhances beach amenity
- ? May cause other issues
May restrict sand flow

Sand back passing

- ✓ 'Tried and tested'
Sand to multiple locations
- ? Maintenance
Closing part of the beach

There will be further opportunities for the community to have their say on the schemes being considered for Stockton CMP 2021 later in the year.
